

Gemalto Cinterion® Wireless Modules Product Families

Gemalto's broad portfolio of Cinterion M2M Modules and Terminals delivers trusted cellular connectivity for any network standard from GSM and LTE to the latest Machine Type Communication. The products' rugged design, unparalleled engineering and highest quality manufacturing ensures reliability in the most demanding environments and over the long life cycle of IoT solutions.

Automotive

Automotive M2M products provide the foundation for advanced telematics and evolving connected car technology. Feature rich and engineered to withstand the extreme environments and requirements of long life on the road, they offer full support for eCall and ERA-GLONASS and they are manufactured according to VDA 6.2 and TS16949 quality standards.

Industrial

Industrial M2M products offer reliability and extreme efficiency for a range of cellular standards from 2G to LTE Cat.1 and the forthcoming lower LTE categories such as Cat.M1 / NB-IoT. Benefits include flexibility, backward and forward compatibility as network standards evolve and longevity to maximize your technology investment. Smart modules powered by Java and Linux improve cost efficiency and design simplicity.

Industrial Plus

Industrial Plus M2M modules leverage the latest cellular standards and features to deliver high speed data and voice communications with multiband capabilities to ensure seamless and world-wide coverage. They are available in local and global variants for GSM, HSPA+, CDMA, Multimode, LTE and LTE Adv.

Terminals

Terminals work out of the box to quickly and easily add M2M IoT connectivity to smart enterprise applications. Available for a variety of network standards and with the option of embedded Java, they are connected via standard interface and require very little integration effort.

The information provided in this flyer contains merely general descriptions or characteristics of performance, which in case of actual use do not always apply as described or which may change as a result of further development of the products. An obligation to provide the respective characteristics shall only exist if expressly agreed in the terms of contract. All product designations may be trademarks or product names of Gemalto M2M GmbH or supplier companies whose use by third parties for their own purposes could violate the rights of the owners. Oracle and Java are registered trademarks of Oracle and /or its affiliates. Other names may be trademarks of their respective owners.
